Bird Studies & Conservation Intern Sought

Juneau Audubon Society is seeking an intern based in Juneau, Alaska. The position is designed to give valuable work experience to those aspiring in careers of biology, research, wildlife, non-profit or environmental work.

Duties to include: Tree Swallow nest box checks, assistance with hummingbird banding and Arctic Tern nest monitoring; data entry and document scanning; help with other wildlife projects, conservation education or public outreach. Independent projects may be available according to Intern interests and organization needs. Excellent work experience for students!

Work dates: approximately April 24 through July 15, 2023. (There is flexibility to accommodate finals week and other commitments)

Schedule: Approximately 25 hours per week (some weekend and early morning work will be required)

Compensation: \$12/hr up to 300 hours (\$3600 stipend for the season)

Desired skills: Interest in wildlife management, biology, and working with non-profit organizations; basic birdwatching skills; data entry and use of spreadsheets preferably Microsoft Excel; an introductory college biology or natural resource course passed; ability to hike several miles; ability to take neat and complete field data.

Volunteer needs to have their own housing in or near Juneau, a cell phone, health insurance, and be age 18 or older.

We provide assistance with transport to field sites (fuel for personal vehicle-preferred, or bike loan/bus pass), and all necessary equipment. Unfortunately, as a small non-profit organization we are unable to provide transport to Juneau or housing.

Interested applicants please send brief letter of interest and CV to: info@juneau-audubon-society.org

Deadline: Open until filled, but please submit by 2/25/23
